PROFILE

I am a fresh graduate in Informatics with an interest in software development, full stack web development, and data analysis. I have experience in developing full stack web-based systems and working on data-related projects. I am a fast learner, adaptable, and highly motivated to develop my skills and contribute to building effective digital solutions.

EDUCATION

Jenderal Soedirman University September 2022 – February 2026
Bachelor of Informatics | GPA: 3.68 / 4.00
Relevant Coursework: Databases, Web Programming, Data Mining & Text Mining, Machine Learning.

INTERNSHIP EXPERIENCE

Telkom Indonesia – Purwokerto Regional Office September – October 2025
Infrastructure Intern

- Supported the infrastructure division in daily operations through data monitoring and validation.
- Performed routine data checks to ensure accuracy and system reliability.
- Assisted in maintaining operational data to support infrastructure performance.

Department of Communication and Informatics of Central Java Province July – August 2024
IT Intern

- Developed the admin module for a web-based E-Pegawai system, including employee data management and user authentication.
- Contributed to an asset management system by organizing and inputting asset data to improve tracking.
- Developed a Service History feature to monitor asset maintenance records.
- Conducted black-box testing and improved system performance through issue identification and fixes.

PROJECT EXPERIENCE

Web-Based Expert System for Nutritional Status Diagnosis October 2025 – January 2026
Final Project

- Developed a web-based expert system using Python (Flask) and Tailwind CSS to diagnose nutritional status and provide personalized recommendations.
- Designed system logic using fuzzy logic and decision tree to process user input and generate accurate diagnostic results.
- Applied data processing techniques to support decision-making and improve system reliability.

Sentiment Analysis of the 2024 Indonesian Presidential Inauguration on X November 2024
Data Science Project

- Analyzed public sentiment on social media (X) using text preprocessing and TF-IDF feature extraction.
- Developed a sentiment classification model using Naïve Bayes and optimized performance with SMOTE to handle class imbalance.
- Improved model accuracy from 98% to 99%, enhancing classification reliability and performance.
- Published the research in a SINTA 2 indexed journal.

ORGANIZATIONAL EXPERIENCE

HMIF UNSOED 2023 March – December 2023

Secretary of Student Resource Development (PSDM) Division

- Managed administrative activities including reports, correspondence, and official documentation.
- Prepared meeting minutes and ensured proper recording and archiving of division activities
- Organized and coordinated division work agenda to support program implementation.
- Participated in monthly staff performance evaluation and contributed to assessment process.
- Supported internal coordination and communication within the division to ensure smooth workflow.

SKILLS & LANGUAGES

Hard skills: Python (Flask), PHP, JavaScript, HTML, CSS, Laravel, CodeIgniter 3, Tailwind CSS, Bootstrap, SQL (MySQL, SQLite), Machine Learning, Data Analysis.
Soft skills: Analytical Thinking, Communication, Teamwork, Adaptability, Problem Solving, Time Management, Attention to Detail.
Tools: Google Colab, Jupyter Notebook, Microsoft Office (Excel, Word, PowerPoint), Google Workspace (Sheets, Docs, Slides), Visual Studio Code, Git, GitHub.
Languages: Indonesian (Native), English (Intermediate)k
