PROFILE

Fresh graduate Informatics student with experience in web development, software testing, and data-related projects. Experienced in building web applications and working with backend systems, APIs, and databases. Interested in Web Development, Software Engineering, and Software Quality Assurance roles. A fast learner, highly adaptable, and detail-oriented individual with strong motivation to build efficient, scalable, and user-centered digital solutions that deliver real impact.

EDUCATION

Jenderal Soedirman University

September 2022 – February 2026

Bachelor of Informatics | GPA: 3.68 / 4.00

Relevant Coursework: Databases, Web Programming, Data Mining & Text Mining, Machine Learning.

INTERNSHIP EXPERIENCE

Telkom Indonesia – Purwokerto Regional Office

September – October 2025

Infrastructure Intern

- Supported the infrastructure division in daily operations through data monitoring and validation.
- Performed routine data checks to ensure accuracy and system reliability.
- Assisted in maintaining operational data to support infrastructure performance.

Department of Communication and Informatics of Central Java Province

July – August 2024

IT Intern

- Developed the admin module for a web-based E-Pegawai system, including employee data management and user authentication.
- Contributed to an asset management system by organizing and inputting asset data to improve tracking.
- Developed a Service History feature to monitor asset maintenance records.
- Conducted black-box testing and improved system performance through issue identification and fixes.

PROJECT EXPERIENCE

Web-Based Expert System for Nutritional Status Diagnosis

October 2025 – January 2026

Final Project

- Developed a web-based expert system using Python (Flask), SQLite, and Tailwind CSS to diagnose nutritional status and provide personalized recommendations.
- Designed system logic using fuzzy logic and decision tree to process user input and generate accurate diagnostic results.
- Applied data processing techniques to support decision-making and improve system reliability.
- Performed Black Box Testing to ensure all system features function correctly according to requirements.
- Conducted User Acceptance Testing (UAT) to validate system suitability with user needs and improve usability.

Expert System for Diagnosing Social Media Addiction Levels (Web-Based)

May – June 2025

Expert System Project

- Developed a web-based expert system using Laravel and SQLite, contributing as a backend developer responsible for building core system logic and data processing.
- Designed and implemented logical workflows and a knowledge base to transform symptoms into structured and accurate diagnostic results.
- Built RESTful APIs and data processing mechanisms to support decision-making within the diagnosis system.

- Performed Black Box Testing to ensure all system features function correctly according to requirements.
- Collaborated with the frontend team to ensure seamless system integration and deliver a user-friendly interface.

Sentiment Analysis of the 2024 Indonesian Presidential Inauguration on X

November 2024

Data Science Project

- Analyzed public sentiment on social media (X) using text preprocessing and TF-IDF feature extraction.
- Developed a sentiment classification model using Naïve Bayes and optimized performance with SMOTE to handle class imbalance.
- Improved model accuracy from 98% to 99%, enhancing classification reliability and performance.
- Published the research in a SINTA 2 indexed journal.

“KonserKita” Concert Ticket Booking System (Web-Based)

May – June 2024

Data Science Project

- Contributed as a UI/UX Designer, designing the interface and user experience for a web-based concert ticket booking platform developed using Laravel.
- Created wireframes, user flows, and prototypes using Figma to ensure an intuitive and efficient ticket booking process.
- Optimized the user interface to be responsive, consistent, and user-friendly by applying a user-centered design approach.
- Collaborated with the development team to ensure design implementation aligned with specifications and supported backend system integration.
- Conducted usability evaluations and design iterations to enhance overall user experience and ease of use.

ORGANIZATIONAL EXPERIENCE

HMIF UNSOED 2023

March – December 2023

Secretary of Student Resource Development (PSDM) Division

- Managed administrative activities including reports, correspondence, and official documentation.
- Prepared meeting minutes and ensured proper recording and archiving of division activities
- Organized and coordinated division work agenda to support program implementation.
- Participated in monthly staff performance evaluation and contributed to assessment process.
- Supported internal coordination and communication within the division to ensure smooth workflow.

SKILLS & LANGUAGES

Hard skills: Python (Flask), PHP, JavaScript, HTML, CSS, Laravel, React JS, CodeIgniter 3, Tailwind CSS, Bootstrap, SQL (MySQL, SQLite), Machine Learning, Data Analysis, Software Testing, REST API Development.

Soft skills: Analytical Thinking, Communication, Teamwork, Adaptability, Problem Solving, Time Management, Attention to Detail.

Tools: Google Colab, Jupyter Notebook, Microsoft Office (Excel, Word, PowerPoint), Google Workspace (Sheets, Docs, Slides), Visual Studio Code, Figma, Git, GitHub, Postman, Android Emulator.

Languages: Indonesian (Native), English (Intermediate).
